

Join B&N's Matt Lewellyn, PE at the  
**2012 International Bridge Conference (IBC)**  
in Pittsburgh, PA

# *Eyesore to* **Icon**

With limited funds and the potential closing of a key transportation link, community officials in West Virginia and Ohio sought a plan to extend the life of the deteriorating Market Street Bridge.

Working with the West Virginia Department of Transportation, Burgess & Niple designed a cost-effective solution to rehabilitate the century-old span. The design transformed the bridge from an eyesore into a community icon. It also enhanced safety, extended the bridge's life and kept an important link to commerce in operation.

**B&N's Matt Lewellyn, PE** will discuss how the project team leveraged its bridge inspection and design expertise to complete this project on a fast-track.

## **IBC SESSION DETAILS**

**Tuesday, June 12 | 8:30 a.m. -12:00 p.m.**

Session: Revitalization of an Ohio River Suspension Bridge (IBC 12-25)

Track: Rehabilitation Part 1
