Grounds for Discussion:

Energy Saving Ideas for Treatment Plants

Have you looked at ways to save energy costs in operating your treatment plant?

Did you know...

- After staff compensation, your energy bill is your largest treatment plant operating expense?
- 80% of energy dollars are spent in operating plant pumps and blowers?

You're invited to join B&N and fellow colleagues for a complimentary breakfast at the OWEA Ohio Conference.

Wednesday, June 19, 2013
6:30 am – 8 am
Loose Moose – Breakfast Café
at Great Wolf Lodge
(OWEA Conference host hotel)
Mason, OH

B&N energy sustainability experts will share information on energy and operational efficiencies at treatment plants and lead a discussion on practical ways to stretch your dollars.

Learn More About...

- 1) What your utility rate structure means and what you pay for electricity
- 2) The impact of your load profile on energy costs
- 3) Steps to achieve energy savings
- 4) How energy savings can be used to offset potential rate increases
- 5) Environmental and social impacts

Your Hosts

Robbie Cameruca, PE
